# DO IT RIGHT: AC ANALYSIS AND TEMP TESTING TECHNIQUES

AC Comeback Analysis/Alternative AC Temp Testing Techniques:  
If you work on Air Conditioning this is a **MUST** attend class!

**When: Wednesday, May 12th**

**Time: 6 pm—10 pm**

**Where: Slackwood Firehouse  
21 Slack Avenue  
Lawrenceville, NJ 08648**

***\*Dinner  
included!***

**Cost: \$89 (\$79 each for 2 or more techs from a shop)**

AC Comeback Analysis/Alternative AC Temp Testing Techniques:

This class will cover the analysis of AC Comebacks, and how to insure that the same comeback does not happen again. This class will cover leak comebacks, defective parts, and how some "standard" repair practices work on some cars well, and how they backfire on other cars. Oils, contamination, compressor failures, hoses, retrofit comebacks, leaks will all be covered to make sure the technician has the best information to make informed choices for AC repairs. This class will also cover alternative testing techniques like temperature vs pressure testing and the pros and cons of this method of testing. This course is a great update, review and compliment to any Air Conditioning Class.

**Sign up with your C&M Sales Rep or Call C&M
